PROFESSIONAL SUMMARY

Master of Information Technology graduate with experience in data analysis, HRIS reporting and business intelligence. Skilled in Power BI, SQL, Excel and Python with practical experience in data cleaning, validation, reporting and data modelling. Currently developing BI solutions through a Business Intelligence/Data Analyst internship, including a financial intelligence platform using Python, SQL and Power BI. Previous experience includes HR data management and reporting in Sri Lanka. Looking for a Data Analyst, BI Analyst, Reporting Analyst or Graduate Business Analyst role where I can turn data into clear and useful business information.

CORE SKILLS

Business Intelligence: Power BI, DAX, Power Query, Tableau, SSRS
Data Analysis: Data cleaning, validation, exploratory analysis, reporting, KPI analysis
Databases: SQL, SQL Server, MySQL
Programming: Python, R, SAS
Data & BI: Data modelling, star schema, ETL, data warehousing
Tools: Microsoft Excel, Microsoft Fabric, Git, GitHub, Jupyter Notebook
Other: Business requirements, documentation, problem solving, stakeholder communication

---

PROFESSIONAL EXPERIENCE

BI / Data Analyst Intern

MVP Studio / Industry Connect — Auckland, New Zealand
Jul 2026 – Present

- Work on a Business Intelligence project focused on turning large financial and social datasets into structured information for analysis and reporting.
- Clean, transform and validate datasets using Python and SQL to improve data quality before analysis.
- Designed a star-schema data warehouse with dimensions for currency, date and platform and fact data for social engagement.
- Prepared datasets and data models for Power BI reporting, including KPI development and analysis using DAX.
- Document technical work, data preparation steps and problem-solving decisions to support a clear and repeatable BI workflow.
- Use GitHub and Jupyter Notebook to manage and document data preparation and analysis work.

Key Project – Noodles Financial Intelligence Platform

- Integrated financial and social engagement data into a structured analytical model to support analysis across currencies and platforms.
- Developed data preparation workflows using Python, SQL and MySQL to clean, validate and transform source data.
- Prepared financial and social metrics for Power BI so that related information could be analysed through a unified reporting structure.

Trainee Software Developer

Interflex (Pvt) Ltd — Sri Lanka
Aug 2025 – Jan 2026

- Developed and maintained application features using C#, ASP.NET Core and Entity Framework.
- Worked with SQL Server to store, retrieve and manage application data.
- Investigated application issues, tested changes and supported improvements to system functionality.
- Used Git for source control and followed structured development and testing practices.
- Worked across application and database components to understand how technical changes affected the overall system.

Junior Data Analyst

Victory Information (Pvt) Ltd — Sri Lanka
May 2022 – Mar 2024

- Cleaned and validated HR data to improve the accuracy and reliability of employee records and reporting.
- Used SQL and Excel to extract, review and analyse employee data for HR reporting and operational requirements.
- Prepared reports and supported Power BI reporting by transforming data into clear and useful information for management.
- Checked data across HRIS and database records to identify inconsistencies and support accurate reporting.
- Worked with senior team members to investigate data issues and provide reliable information for business reporting.
- Maintained structured documentation and followed data management processes to support consistent reporting.

ADDITIONAL NEW ZEALAND EXPERIENCE

Team Member

KFC — Auckland Airport, New Zealand
May 2024 – Present

- Provide customer service and process customer transactions accurately in a busy environment.
- Work effectively with team members during high-volume periods while maintaining service and operational standards.
- Manage multiple tasks and respond to customer requests while maintaining accuracy and attention to process.
- Demonstrate reliability, teamwork and adaptability while balancing employment with postgraduate study and professional development.

EDUCATION

Master of Information Technology — Merit

Eastern Institute of Technology (EIT), New Zealand
Completed 2025

Thesis: *A Comparative Analysis of Traditional and AI-Based Traffic Management Systems*

Relevant areas:
Power BI & Data Analytics | Data Visualisation | Cybersecurity | Quantitative Methods | Applied Research Methods

Bachelor of Science (Computer Science and Applied Mathematics)

Open University of Sri Lanka
Completed May 2022

SELECTED PROJECTS

Noodles Financial Intelligence Platform
Python | SQL | MySQL | Power BI | DAX | Data Modelling

- Designed a star-schema data warehouse integrating financial and social engagement data.
- Built data preparation workflows to clean, validate and transform source datasets.
- Developed analytical structures for currency, date and platform dimensions and social engagement facts.
- Prepared data for Power BI analysis and reporting.

Heart Disease Data Analysis
R | Statistical Analysis | Data Visualisation

- Analysed 246,000+ records from the CDC BRFSS dataset to investigate factors associated with heart disease.
- Performed data preparation, statistical analysis and model comparison using R.
- Compared multiple machine learning approaches and evaluated model performance using appropriate metrics.
- Presented analytical findings through clear visualisations and reporting.

TECHNICAL PROFILE

Power BI: Dashboards, data modelling, Power Query, DAX
SQL: SQL Server, MySQL, querying, data validation
Data: Data cleaning, transformation, ETL, reporting, data warehousing, star schema
Programming: Python, R, SAS, C#
Analytics: Statistical analysis, data visualisation, KPI reporting
Tools: Excel, Tableau, SSRS, Microsoft Fabric, Git, GitHub, Jupyter, Visual Studio
